Subject: Meeting between ROOT-GUI and LHCb Online

Dear all,

   I would like to organize a meeting to discuss the needs of LHCb on GUI in the online environment with relevant members of the LHCb Online team and the GUI specialists of the ROOT team. The main goal for this meeting is to help understanding what possibilities exists in ROOT for GUI and what directions should LHCb be taking to maximize the chances of success for building their applications.

   I would propose either this Thursday 14th at 16:00 or Friday 15th at 15:00 for a couple of hours maximum. Please tell me which one of the two options is more convenient for you. I'll book a meeting room as soon we agreed with the date and I will also circulate an initial agenda.

   Feel free to invite any other people relevant on this subject and that you think should participate to the meeting.

Best regards,

Pere
